

PARVEZ ALAM SHAIK

Guntur, Andhra Pradesh, India | +91 7386340947 | parvezalamshaik59@gmail.com | linkedin.com/in/parvez-alam-shaik-7b1117306

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on experience building full-stack web applications and AI-integrated systems. Proficient in Java, C, and the MERN stack, with practical knowledge of LLM integration, REST API development, and cloud-ready backend design. Eager to contribute to a product-focused engineering team and grow through real-world software development challenges.

EDUCATION

Bachelor of Technology — Computer Science and Engineering | Vignan's Foundation for Science, Technology & Research (Deemed University) Sep 2022 – May 2026
Guntur, Andhra Pradesh | CGPA: 7.0 / 10

TECHNICAL SKILLS

Languages:	Java, C
Frontend:	HTML, CSS, JavaScript, ReactJS
Backend:	Spring Boot, REST APIs, Node.js, Express.js
Databases:	MySQL, MongoDB
AI / GenAI:	LangChain, LLM Integration, Prompt Engineering, RAG, OpenAI API, Gemini API
Tools:	Git, GitHub

PROJECTS

- Recipe Finder Website** 2024
 - Built a responsive web application using the MERN stack (MongoDB, Express.js, React, Node.js) that allows users to search, filter, and save recipes.
 - Designed a clean, mobile-friendly UI using ReactJS with real-time search functionality and dynamic content rendering.
- AI Customer Service Agent (Gemini API)** 2024
 - Developed an intelligent customer support agent powered by the Gemini API, capable of handling FAQs, routing queries, and generating context-aware responses.
 - Integrated prompt engineering techniques to improve response accuracy and reduce hallucinations in multi-turn conversations.
- Student Information System** 2023
 - Built a full-stack application using Spring Boot and RESTful APIs to manage student records, course enrollment, and academic data.
 - Designed normalized MySQL schemas and implemented CRUD operations with validation and error handling.
- AI Research Assistant** 2024
 - Developed a research collaboration platform that leverages LLM integration and RAG (Retrieval-Augmented Generation) to surface relevant papers and grant opportunities.
 - Implemented document ingestion pipeline using LangChain to enable semantic search over large research corpora.
- Clustering Performance Using GPU Parallelization** 2024
 - Implemented and benchmarked clustering algorithms (K-Means) using parallel and distributed computing techniques to achieve performance improvements over CPU baselines.
 - Evaluated scalability and throughput metrics across varying dataset sizes in a parallelized environment.

CERTIFICATIONS

- Sensors and Actuators — NPTEL

- E-Business — NPTEL
- Packet Tracer (Networking Fundamentals) — Cisco
- AI Hackathon Participant

LANGUAGES

English (Fluent) | **Hindi** (Proficient) | **Telugu** (Proficient) | **Urdu** (Proficient)

ADDITIONAL ACTIVITIES

- Active member of the university tech club; contributed to promotional campaign design and event coordination.
- Interests: Web development, video editing, and exploring emerging technology trends.
